To the Editor of The Evening Star: It is said that Secretary Carlisle has requeste the civil service commission to so amend the rules to permit substitute clerks to be appointed permanent clerks after July 1st prox. The objections to such a course are manifold It is a gross violation of the spirit, if not the letter of the civil service law. Why? Because

these substitutes, as a rule, were appointed such

by special favoritism and entirely outside of any civil service examination, many of them not taking said examination for months after they went into the service as "subs." I know of one case where a lady took the civil service examination four months after she came into the Treasury Department as a "sub." Now, it is obvious that under such an amended rule as Secretary Carlisle seeks this lady and all others like her get into the permanent classified service not by virtue of having passed a civil service examination, but by reason of having through some sort of favoritism been appointed a substitute clerk.

This is manifestly unjust to other persons on the civil service eligible list who by priority of examination are entitled to appointment in preference to this lady. And this is only one instance in many.
